

# Theresa Barket, PhD

Principal Investigator & Lithics Specialist

## EDUCATION

*Ph.D Anthropology,  
University of California,  
Riverside, 2016*

*M.A. Anthropology,  
California State University,  
Bakersfield, 2007*

*B.A. Anthropology,  
Minnesota State University  
at Moorhead, 2002*

## REGISTRATIONS & CERTIFICATES

*Society of American  
Archaeology*

*American Schools of  
Oriental Research*

*ex oriente e.V.*

## WORK HISTORY

*SRSinc, Principal  
Investigator & Lithics  
Specialist  
2009, 2016-Present*

*Quarterly Instructor,  
California State University  
Los Angeles,  
2014-Present*

*Teaching Assistant  
Instructor, University of  
California, Riverside,  
2008-2013*

*Staff Archaeologist,  
Company Center for  
Archaeological Research,  
2004-2007*

## PROFESSIONAL EXPERIENCE

As an archaeologist interested in prehistoric cultures and stone tool technology, Dr. Theresa Barket draws upon field and lab experience in a number of different regions. After working for several years in cultural resource management in the Midwest, Northern Plains, and California, Barket worked at the site of Tell El-Hibeh in Egypt for her Masters Project. She received her Master of Arts Degree from California State University, Bakersfield in 2007, and promptly went on for a Ph.D. at the University of California, Riverside; this, in turn, left Barket switching geographical regions once again to focus on the Neolithic Period in the Near East. After completing her Ph.D. in March 2016, she has most recently worked at the Epipaleolithic site of Kharaneh IV in Jordan. During the course of her archaeological career, she has also accrued a great deal of experience in the archaeology of the southern San Joaquin Valley, the southern Sierras, and the Mojave Desert. Adding to her diverse regional interests, she is an accomplished stoneworker, a skill that she uses to inform both her academic and professional research.

## SUMMARY PROJECT EXPERIENCE

- **Lithic Analyst**  
Lithic technology and analysis; Near Eastern prehistory and lithic technology; Neolithic period in the southern Levant; Prehistory of Mojave Desert and Great Basin; Lithic technology and flint quarries of Ancient Egypt.

## RECENT FIELD EXPERIENCE

- 2016 P: 2 week (w) *Field Assistant*, Assisted in excavation at the Epipaleolithic site of Kharaneh IV for the Epipaleolithic Foragers in Azraq Project (EFAP).
- 2013 P: 4 w *Field Assistant*, Assisted in excavation at the Epipaleolithic site of Kharaneh IV for the Epipaleolithic Foragers in Azraq Project (EFAP).
- 2012 P: 3 w *Field Assistant*, Assisted in excavation at the Epipaleolithic site of Uyun al-Hamman in Wadi Ziqlab, Jordan.
- 2011 P: 3 w *Lithic Analyst*, Assisted in the analysis and sorting of debitage and tools from Kharaneh IV for the Epipaleolithic Foragers in Azraq Project (EFAP).
- 2010 P: 5 w *Field Assistant*, Assisted in pedestrian survey and mapping for the al-Jafr Basin Lower Paleolithic Project.
